RJMLAIRD.CO.UK / PRESENTATION SYSTEM

Presentation Title Goes Here

A clear, evidence-led subtitle that explains the central question.

Presenter Name · Organisation

12 OCTOBER 2026 / VERSION 1.0

REPLACE ALL PLACEHOLDERS

Start with the question that matters.

01

One short framing statement. Explain why this section exists and what the audience should take away.

SECTION DIVIDER / OPTIONAL INTRODUCTORY STATEMENT

OVERVIEW

Today’s route through the evidence

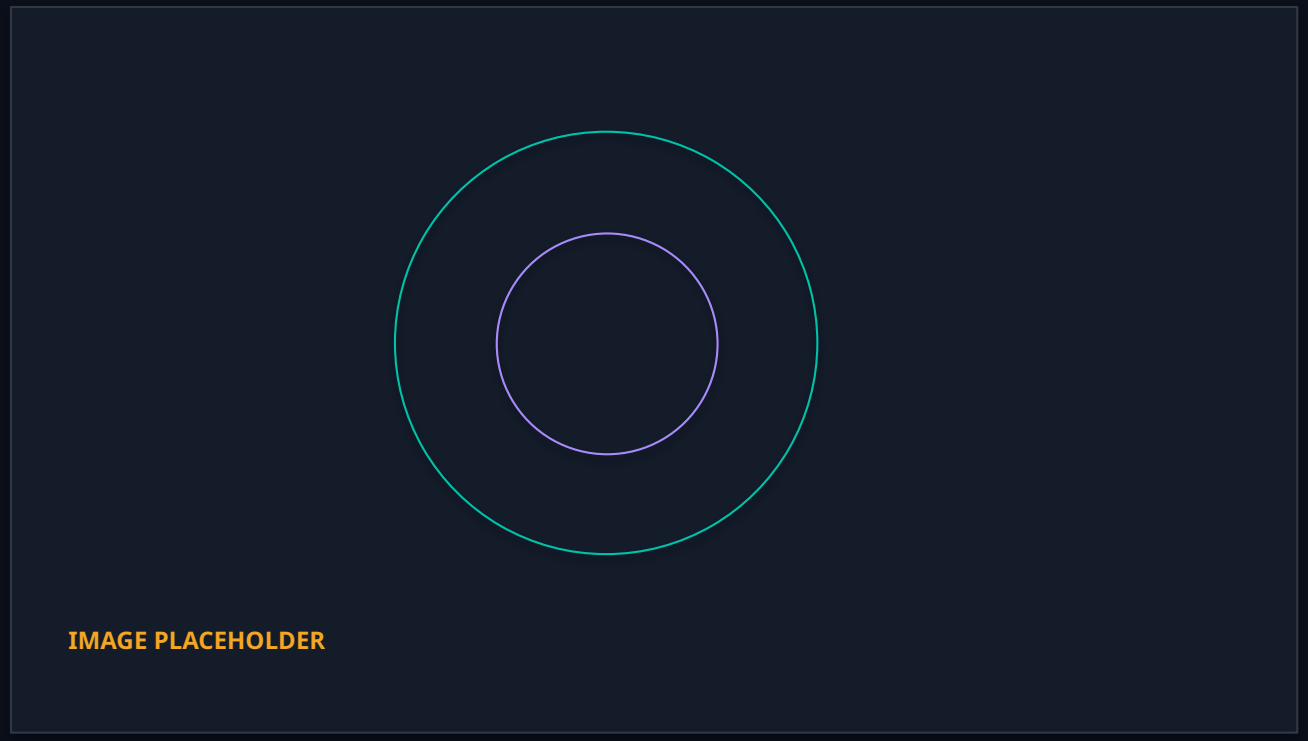

A useful agenda describes the questions to resolve, not just the topics to cover.

01	**The context**	What has changed, and why now?
02	**The evidence**	What do the data and sources show?
03	**The implications**	What follows from the findings?
04	**The next steps**	What should happen next?

EDITORIAL LAYOUT

A visual that earns its place

Pair one strong image with a concise explanation and a visible source.

Caption: describe what the image shows and why it matters. Credit the creator or source.

The story behind the image

Lead with the insight, not a description of the slide.

Add two or three sentences of context. Keep the evidence close to the claim.

Use an image with a clear purpose: explain, locate, compare or humanise.

COMPARISON

Two perspectives, one decision

Use matched structure so the audience can compare like with like.

OPTION A

Build on what works

- Strength: established capability
- Trade-off: incremental improvement
- Best when: risk needs to stay low

OPTION B

Change the operating model

- Strength: unlocks new possibilities
- Trade-off: transition effort
- Best when: the case for change is clear

KEY FINDINGS

Three messages to remember

Make the conclusion scannable before the supporting detail.

01

The signal

State the strongest evidence-backed finding in one sentence.

02

The consequence

Explain what that finding changes for the audience.

03

The action

Name the decision, test or next step that follows.

Replace these prompts with findings that are supported by the cited evidence.

METRICS

Numbers need interpretation

Use a small number of meaningful metrics; always state the unit and period.

00.0%

Primary metric

Period: YYYY–YYYY

000

Supporting count

Unit: items / people

±0.0

Change over time

Baseline: YYYY

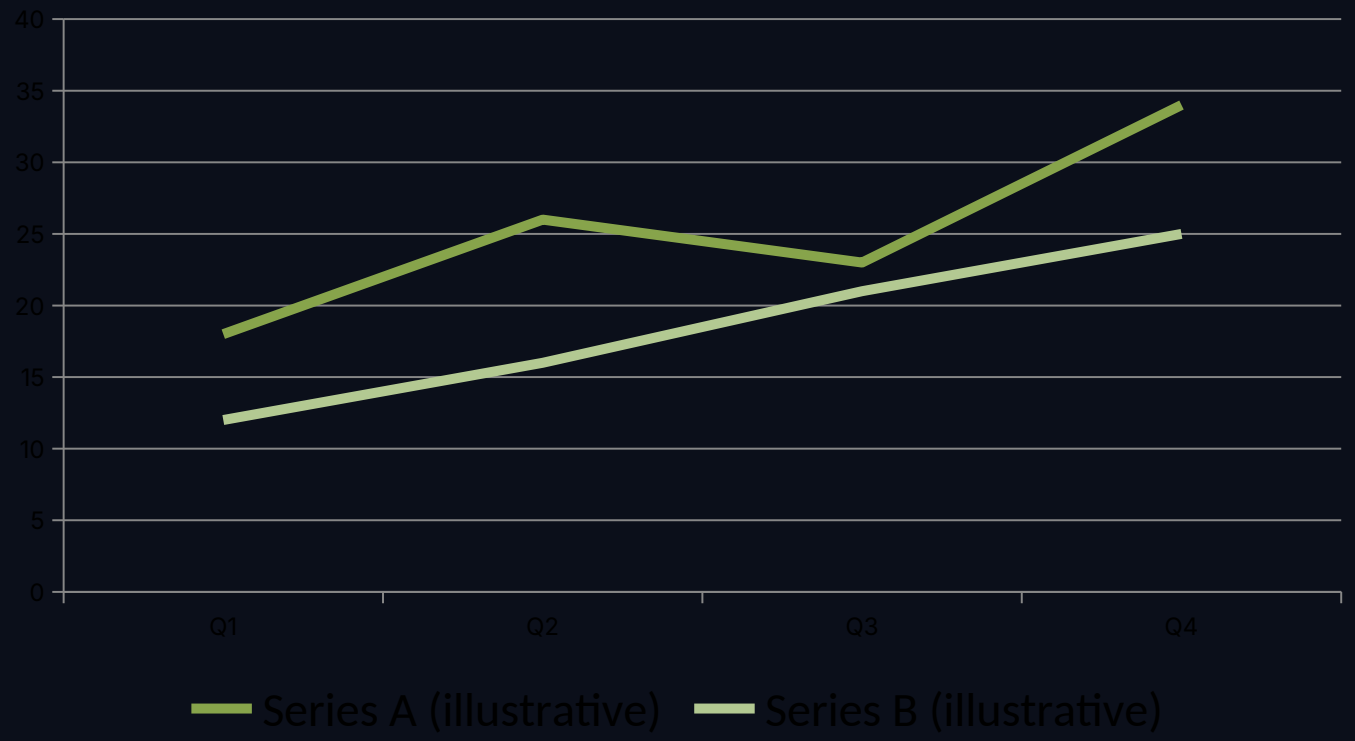

INTERPRETATION

What changed, compared with what baseline, and why should the audience care?

CHART-LED ANALYSIS

Show the pattern, then explain it

Illustrative values only — replace with verified data and update the source.

TAKEAWAY

Describe the change, not just the line.

- Identify the trend
- Note any caveats or uncertainty
- Explain the decision implication

Source: [dataset / author / URL], accessed [date]. Values shown are illustrative.

> **Insert a short, memorable quotation that adds evidence, perspective or human meaning.**

NAME / ROLE

Organisation · Source or publication · Date

Verify the exact wording and permission / attribution requirements.

TABLE / COMPARISON

Make the comparison easy to scan

Keep labels short, align units and avoid relying on colour alone.

CRITERION	OPTION A	OPTION B	EVIDENCE / NOTE
Cost	[value + unit]	[value + unit]	[source / assumption]
Time	[duration]	[duration]	[method / scope]
Impact	[measured outcome]	[measured outcome]	[indicator]
Risk	[rating + rationale]	[rating + rationale]	[mitigation]

Table note: define the scope, time period and any abbreviations below the table.

A sequence with clear decision points

Show dependencies and outcomes, not just a list of activities.

01

Frame

Question + scope

Define success

02

Test

Evidence + options

Validate assumptions

03

Decide

Trade-offs + owner

Record the decision

04

Learn

Measure + adapt

Review outcomes

CASE STUDY

From challenge to evidenced outcome

Keep the chain of reasoning visible and separate results from interpretation.

CHALLENGE

What needed to change?

Evidence: [metric, quote, source or artefact]

INTERVENTION

What was done, and why?

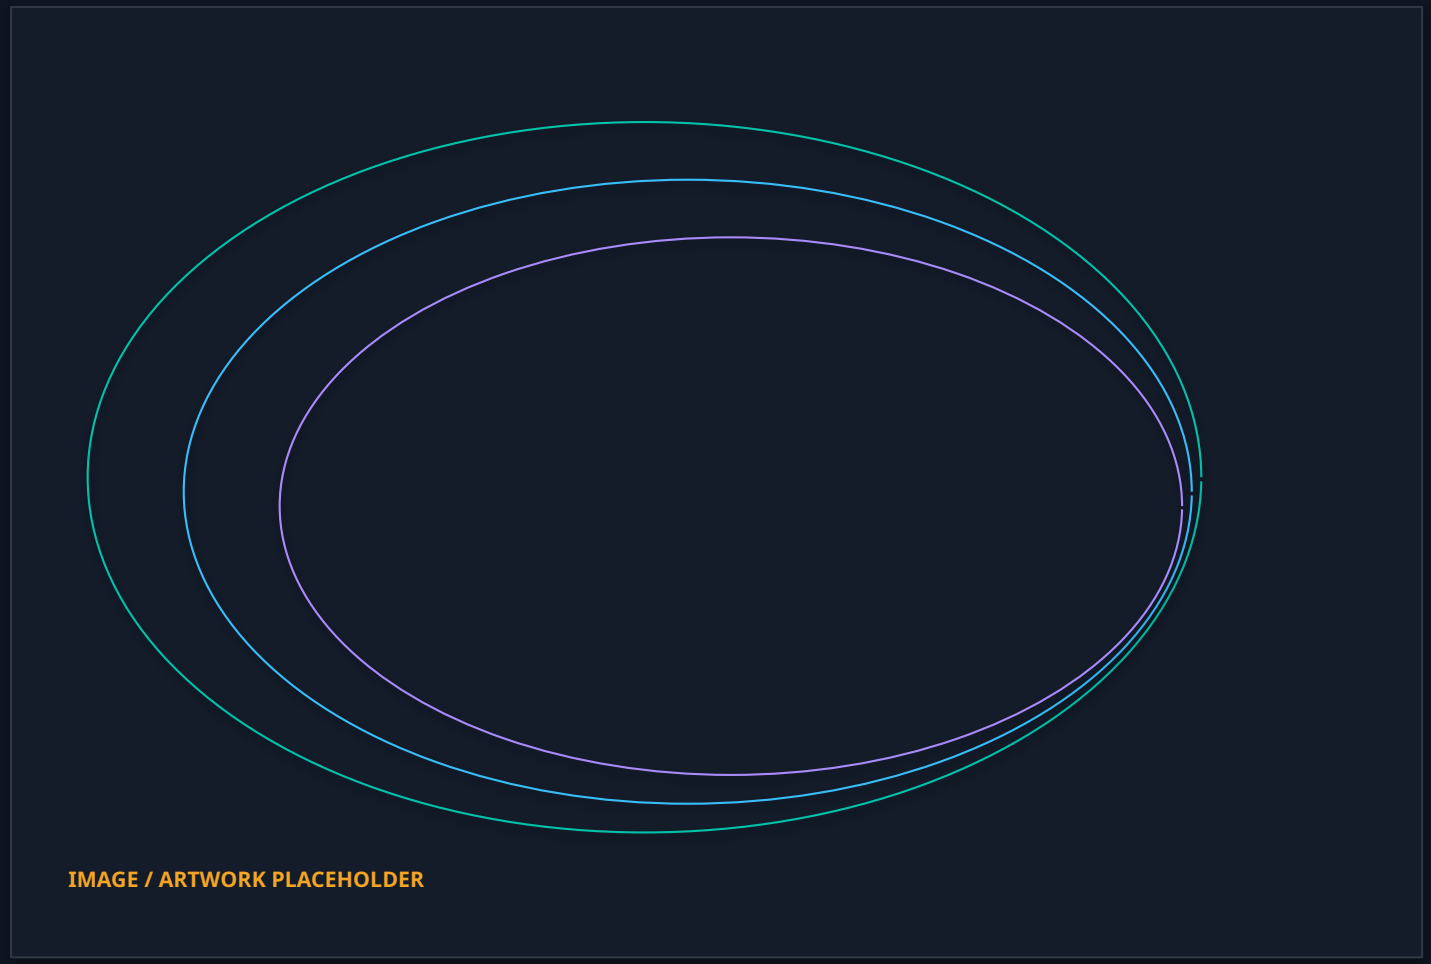

Evidence: [metric, quote, source or artefact]

OUTCOME

What changed measurably?

Evidence: [metric, quote, source or artefact]

Context / scope: [client or project, timeframe, constraints, attribution caveats]

One idea. Clearly stated.

Add one supporting sentence. Use the visual to amplify the message, not compete with it.

Image credit: [creator / licence / URL]

Make the next step unmistakable.

Summarise the decision or action you want the audience to take.

LINKEDIN

[profile URL]

Make every important claim traceable

Use a consistent citation style and keep source notes close to the relevant claim.

[01] Author / organisation (Year). Title. Publisher. URL or DOI.

[02] Dataset name (version / date). Provider. URL. Accessed YYYY-MM-DD.

[03] Interview / communication, role, date (permission status if relevant).

[04] Method note: scope, assumptions, exclusions and limitations.

For linked documents, test every hyperlink after exporting or sharing the deck.
